

A decorative border of bright yellow flower petals, likely from a sunflower, frames the central text area. The petals are layered and overlap, creating a natural, organic frame.

SAHANA

Because Disasters aren't Proprietary

“No innovation matters more than that which saves lives”

Avelino J. Cruz, Jr., Secretary of National Defense, Philippines, on the use of Sahana that was deployed in the aftermath of the disastrous mudslides in the Philippines, 2006

PROBLEM

- The Trauma caused by waiting to be found or find the next of kin
- Coordinating all aid groups and helping them to operate effectively as one
- Managing the multitude of requests from the affected region and matching them effectively to the pledges of assistance
- Tracking the location of all temporary shelters, camps etc

SAHANA

- Disaster Management System
- System to manage disaster aftermath
- Web based portal
 - with sub applications
 - built to address coordination and collaboration problems
 - between civil society, government, private sector, volunteers and victims

Core Modules

Organization Registry

Helps maintain data (contact, services, region, etc) of organizations, groups and volunteers working in the disaster

The screenshot shows the 'Organization Registration' form in the SAHANA Disaster Management System. The form is titled 'Organization Registration' and includes a note: 'Fields marked with * are required (entry is compulsory)'. The form has two main sections: 'Organization Information' and 'Base Location Information'. The 'Organization Information' section includes fields for 'Organization Name', 'Organization Type' (a dropdown menu with 'Government' selected), and 'Services Provided' (a list box with options: Agriculture, Area Development, Communications, and Disaster Preparation). The 'Base Location Information' section includes fields for 'Country of Origin' (a dropdown menu with 'Sri Lanka' selected), 'Registration Number', 'Province' (a dropdown menu with 'Western' selected), and 'District' (a dropdown menu with 'Colombo' selected). The left sidebar shows the 'ORGANIZATION REGISTRY' menu with options: Home, Register, Organization, Volunteer, View, Organizations, Volunteers, Reports, Drill down by Location, Organizations by Sector, and Search. The 'SAHANA MAIN' menu includes: Sahana Home, Camps Registry, Missing Person Registry, Organization Registry, Request Management System, and System Administration.

Missing Persons / Disaster Victim Registry

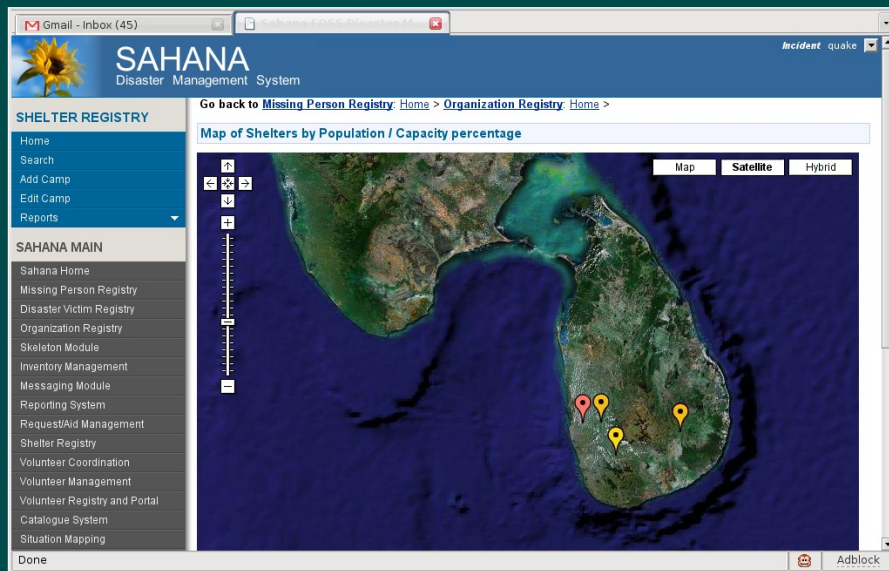

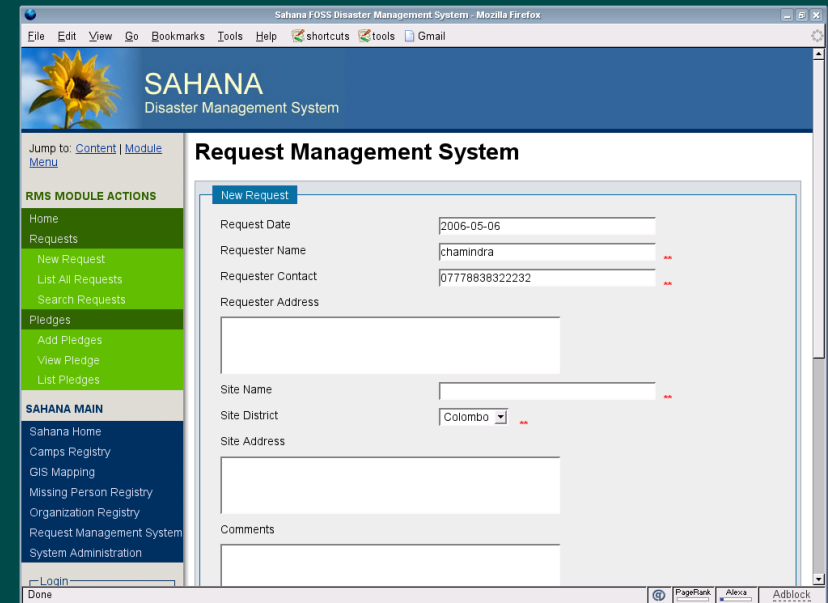

Helps track and find missing, deceased, injured and displaced people and families

The screenshot shows the 'Missing Person Registry' page in the SAHANA FOSS Disaster Management System. The page includes a 'Basic Search' section with fields for 'Any Card Number' and 'Any Name', and a 'Next' button. Below the search section, it states 'Total 10 Records were found' and provides links for 'Next 5 Records >>' and 'Last 5 Records <<'. The main content is a table with columns: Picture, Name, Appearance, Missing Details, and Status. The table lists two records: 'Master Yoda' and 'Yoda Cartman'. Each record includes a small photo, the name, a 'Tracked by' field (both set to 'Darth Vader'), and an 'Add a tracker' link. The 'Appearance' column provides details like height, weight, eye color, skin color, and hair color. The 'Missing Details' column includes the last seen location and date. The 'Status' column indicates the person is 'Missing' and provides a link to 'Click to change to found'.

Picture	Name	Appearance	Missing Details	Status
	Master Yoda Yoda	Height : 66 Meters Weight : unknown Eye Colour : Light Brown Skin Colour : Other Hair Colour : Other	Last Seen : swamp planet of Dagobah	Missing Click to change to found
	Yoda Cartman Yo Cartman	Weight : infinity Eye Colour : Black Skin Colour : White Hair Colour : Unknown	Last Seen : south park Comments : Really fat	Missing Click to change to found

Core Modules ...

Request Management System
Tracks all requests and helps match pledges for support, aid and supplies to fullfilment

Shelter Registry
Tracks data on all temporary shelters setup following the Disaster

Mifan Careem: IEE/IET Workshop, University of Peradeniya, Sri Lanka

Deployments

- CNO, for Tsunami in Sri Lanka – 2005
 - Officially deployed and tracked ~ 26000 families
- NADRA, for Asian Quake in Pakistan – 2005
 - Officially deployed and integrated to NADRA (Pakistan Government) to track all victims
- For Landslide disaster in Philippines– 2005
 - Officially deployment to track all victims,orgs,camps by Government

Deployments...

- Pre-deployment in Sarvodaya, Sri Lanka
 - Customization for Sahana requirements
- Pre-deployed independently in Australia
- Yogyakarta Earthquake, Indonesia – 2006
 - Deployed by ACS, Indonesian Reliefsources
- Pre-deployment for Red Cross, Sri Lanka
- Pre-deployment in Indonesia - 2007

Recognition

- 2006 FSF Award for Social Benefit
- User Award from Redhat Summit
- ICTA Awards to contributors
- Software 2006 CA, USA, Good Samaritan Award
- Free Software Foundation (FSF) award for Social Benefit inspired by Sahana
- Sourceforge Project of the Month, June, 2006
- Used for many Research Projects, University Courses in many Universities Globally.
